ARMONICA

CEILING

TYPE:

PROJECT NAME:

Armonica was born from design research oriented towards the formal and stylistic recovery of the features that made design unique in the 70s, with innovative solutions and rationalization of use. The result is a suspension, adjustable floor, wall, and ceiling lamp, with high luminous power, harmonious features and a strong identity: for a wide array of different uses. Lightness, adjustability, and ease of maintenance are further advantages of Armonica.
Materials: chromed, gold and brushed copper metal and borosilicate glass
